Risk Analysis

Basic Info of SME

Name: Baker Goods

Industry: Banking and Finance

Region: Western Visayas (Region VI)

Years in Operation: 7

Financial Score

Score: 50.0

Risk: The financial score is significantly below average, indicating potential liquidity, profitability, or solvency concerns. This is a critical weakness that may impact long-term viability and the ability to fund ESG initiatives. **Immediate Mitigation:** Conduct a detailed financial audit to identify root causes, Implement strict cost controls.

review revenue streams, and consider short-term financing options to stabilize cash flow.

Environmental Score

Score: 84.7

Strength: Strong environmental management practices are in place, likely reducing regulatory and reputational

risks.

Immediate Mitigation: Maintain current standards and prepare for evolving regional environmental regulations.

Social Score

Score: 85.4

Strength: High social score suggests effective stakeholder engagement, employee relations, and community

involvement.

Immediate Mitigation: Continue monitoring social impact and address any emerging issues proactively.

Governance Score

Score: 92.5

Strength: Robust governance structures and compliance frameworks are evident, minimizing risks related to

ethics, transparency, and regulatory breaches.

Immediate Mitigation: Sustain governance practices and periodically review policies for relevance.

Suppliers, Supplier Score, and Final ESG Rating

Top Supplier: Magic Touch (Score: 79.2)

Final ESG Score: 81.0

Assessment: Supplier risk is moderate but manageable; ongoing due diligence is recommended.

Short Conclusion

Baker Goods demonstrates strong ESG performance in environmental, social, and governance domains, but its low financial score presents a significant risk. Immediate financial stabilization is necessary to support continued ESG leadership and operational resilience.
